Alyssa McDevitt
Software Engineer

ABOUT ME

I've loved working with computers since 3rd grade, and I want to use them to make amazing things. In middle school I was apart of my school's tech crew. In high school, I was on my school TV station, computer club, and I helped create our school's Hour of Code. Once I know of something that could be fixed with an app or web service, I'll plan it out and work on it until it's a refined product.

I'm just starting out, but i'm always working and willing to learn.

EXPERIENCES

NCWIT Aspirations award

2015

The National Center for Women & Information Technology (NCWIT) is a national non-profit organization that works to increase the meaningful participation of girls and women in computing. I won an award at high school level for 2015.

WWDC Scholar

JUNE 2015

I learned Swift weeks before the deadline for scholarship applications and was accepted. I attended Apple's Worldwide Developer Conference from June 7th-12th and learned a lot to improve my iOS skills.

PENNAPPS

SEPTEMBER 2015

I attended University of Pennsylvania's Hackathon for Fall of 2015. I made several amazing connections and learned plenty of new skills. I also was invited to attend CitrusHacks and MHacks, but did not attend.

INTEREST

CODING / DESIGN / MUSIC LISTENING / TRAVEL
